Technical Specifications of Virgin Quartz Surfaces

Test Performed	Test Procedure	Test Results
Density	ASTM C97	2.4 g/cm ³
Mohs hardness	BS 6431	6-7 Mohs
Impact resistance		15-30 CM for 1.5 CM Products
	TS EN 14617-9	35-60 CM for 2 CM Products
		80-175 CM for 3 CM Products
Flexural strength	TS EN 14617-2	40-70 N/M m ²
	ASTM C880	6301 psi
Abrasion resistance	TS EN 14617-4	140-175 mm
Water absorption	TS EN 14617-1	0.01%
	BS 6431-11	0.01%
Flame spread	ASTM E-84	Class A
Chemical resistance	ASTM D2299	Only strong and bases may affect
	BS-6431-18	
Resistance to freeze and thaw cycling	ASTM C1026	No Change
Modulus of rupture	BS 6431-12	52.4 N/mm (m ²)
Thermal shock resistance	ASTM-C484	No visible defects
Weathering	ASTM G23	No Visible change after 100 hours

Care & Maintenance of Virgin Quartz Surfaces

REGULAR CLEANING

Common household spills—such as tea, coffee, juice, soda, vegetable juice, olive oil, liquid food coloring, or grease spills are easily removed and the surface is restored to its original appearance by using any commonly available multipurpose cleaner or mild detergent, then rinse off with warm water after use and dry with soft cloth or paper towel.

Those wishing to use environmentally safe cleaners may also use a combination of 50/50 vinegar & water, rinsing afterwards.

CLEANING STUBBORN STAINS

For stubborn or dried spills, use a non-abrasive cleaning pad such as a 3M Scotch-Brite scrub pad combined with a small amount of mild soap or specialized stone cleaner (not directly on to the countertop). Wipe the area using a circular motion, rinsing thoroughly with water and dry with soft cloth or paper towel.

DRIED RESIDUE

For food, chewing gum, nail polish, paint or any foreign matters that are strongly adhered to any Virgin Quartz Surfaces, simply scrape them away with a sharp plastic scraper. If a metal blade is used in scraping, it may leave grey marks on the surface which an ordinary scouring pad will easily remove. Wash and rinse the surface with clean water.

CLEANING IN HIGH TRAFFIC AREAS

In General, it is recommended to entrust the cleaning in high traffic areas to specialized companies. However, we list at least some of the most important rules:

- For cleaning of continuously very dirty floors, use only recommended products and not the mixtures of chemicals.
- Virgin Quartz surfaces in high traffic areas should be cleaned daily with a clean, dry mop or soft bristle broom.
- Spills should be spot treated with the use of a damp mop or cloth towel and, if necessary, a small amount of mild soap or specialized stone cleaner.
- A floor machine such as a slow speed buffer or walk behind scrubber can be used for a larger commercial environments. Be sure to rinse thoroughly to remove any haze residue that may diminish the shine and beauty of the floor.

RESISTANCE TO SCRATCH

Quartz is one of the hardest materials in nature, which is your assurance that your Virgin Quartz Surface will not easily scratch or chip. To keep the surfaces in immaculate condition for years, always use a cutting board for food preparation. Never cut directly on a countertop surface.

EXPOSURE TO CHEMICALS AND SOLVENTS

Common household spills such as tea, coffee, juice, soda, vegetable juice, olive oil, liquid food coloring, or grease spills are easily removed and the surface is restored to its original appearance by using any commonly available multi – purpose cleaner or mild detergent, then rinse off with warm water after use and dry with soft cloth or paper towel.

RESISTANCE TO HEAT

Do not use strong abrasive and/or alkaline cleaning products. To maintain the natural beauty of Virgin, do not place hot skillets, roasting pans, electric frying pans, crock pots or toaster ovens, directly on to the surface but use a trivet instead.

Virgin Granite Surfaces

At Virgin Surfaces, we attentively understand, source, manufacture and consistently distribute a wide range of fine crafted, premium natural stones.
